

# CATEGORY STYLE GUIDELINE: HAIR CLIP

## Style Guidelines

On a marketplace, the product image is one of your most valuable marketing tools. When customers browse Amazon.in pages, often the image draws them to consider your product. In addition, with so many choices available for online purchases, a well-formed image can set your product apart from the others. Poor quality images turn customers away. Use your product images to communicate the selling points and features of your products, to inform and interest customers, and reinforce your brand. Listings with missing or non-compliant images are suppressed from the site, thereby getting low customer traffic and conversion rates, resulting in missed sales opportunities.

### Image Guidelines:

Every product requires at least one high-quality image showing an accurate and clear representation of your product.

### Image Standards

Every product needs one or more product images. The primary image of your product is the MAIN image. The MAIN image displays for a product in the search results and browse pages, and is the first image customers see on product detail pages. Since images are very important to customers, quality matters. Choose images that are clear, easy to understand, and attractively presented.

- Images must accurately represent the product and show only the product that's for sale. Also there should be consistency between the main and secondary images
- MAIN images must have a pure white background (pure white blends in with the search and product detail pages—RGB color values of 255,255, 255).
- MAIN images must be professional photographs of the actual product. Graphics, illustrations, mockups or placeholders aren't allowed. They must not show excluded accessories; props that might confuse the customer; Text, logos, watermark, or inset images are not allowed.
- **Each product must compulsorily have minimum 3 images**
- Images must match the product title.
- Images must have more than 72 dpi resolution.
