

Style Guidelines

On a marketplace, the product image is one of your most valuable marketing tools. When customers browse Amazon.in pages, often the image draws them to consider your product. In addition, with so many choices available for online purchases, a well-formed image can set your product apart from the others. Poor quality images turn customers away. Use your product images to communicate the selling points and features of your products, to inform and interest customers, and reinforce your brand. Listings with missing or non-compliant images are suppressed from the site, thereby getting low customer traffic and conversion rates, resulting in missed sales opportunities.

Image Guidelines

- Main image should have 100% White Background.
- The product must fill 85% or more of the image. Minimum 3 images required.
- MAIN images should be supplemented with additional images showing different sides of a product, or details that are not visible in the MAIN image.
- Secondary images should complement to the main image
- Main and additional images should not include logos or watermarks/texts.
- Images should be 1000 pixels or more in either height or width as this will enable the zoom function on the website (zoom has been proven to enhance sales). Files measuring less than 500 pixels on the longest side will be rejected by our system.
- Detail shots where applicable need to be added
- Include only what the customer will receive; no accessories unless they are accompanied with the product.
